

QSX-Enh-P ER, ASR (Clone E115)

Catalog Number:	AP32052-004
Format/ Size:	Cartridge, 4mL
Dilution:	Ready-to-use

Intended Use:

Analyte Specific Reagent. Analytical and performance characteristics are not established.

Summary and Explanation:

QSX-Enh Estrogen Receptor (ER), Clone (E115) is a ready-to-use rabbit monoclonal antibody against human ER. ER is an approximately 66 kDa protein that acts as an estrogen-dependent, nuclear hormone receptor. Various studies have shown that ER is present in the nuclei of epithelial cells in normal breast and endometrial tissues.

Clone	Species	Total Protein Conc.
E115	Rabbit	10 mg/ml

Application:

Immunohistochemistry.

Supplied As:

Liquid, buffered protein reagent with ProClin™ 300 preservative.

Storage and Handling:

This product should be stored at 2-8°C and is suitable for use until expiration date when stored at this temperature. Do not freeze. Do not use the product after expiration date unless dating extension information is provided by Novodix.

Specimen Preparation:

Paraffin Sections: Tissues routinely processed, neutral buffered 10% formalin-fixed are suitable for use prior to paraffin embedding. Consult references (Kiernan, 1981; Sheehan & Hrapchak, 1980). Variable results may occur as a result of prolonged fixation. Each section should be cut to the appropriate thickness (approximately 4-5 µm) and placed on a positively charged glass slide. Slides containing the tissue section may be baked for at least one hour but not exceeding 24 hours in a 58-60°C±5°C oven. Osseous tissues should be decalcified prior to tissue processing to facilitate tissue cutting and prevent damage to microtome blades (Kiernan, 1981; Sheehan & Hrapchak, 1980).
